

SAF-T Ambulance

Deloitte SAF-T ambulance is a service where Deloitte produces SAF-T files for the client as a one time service.

A three-step approach:

1. The client exports data to templates, option between .xlsx or .csv format.
2. Deloitte will receive the templates with source data and produce the SAF-T File to the client.
3. The client is now ready to share the SAF-T File with the tax authorities.
